

## Progress Report

Name: Karim Elgammal  
Course: Deep Learning with MATLAB  
Progress: 1% complete (as of 18-Jul-2018)

### Chapters

- |   |                   |
|---|-------------------|
| 1. Classifying Images with Convolutional Networks 28%   | 12. Project 0%    |
| 2. Interpreting Network Behavior 0%                     | 13. Conclusion 0% |
| 3. Creating Networks 0%                                 |                   |
| 4. Training Networks 0%                                 |                   |
| 5. Improving Performance 0%                             |                   |
| 6. Project 0%   |                   |
| 7. Performing Regression 0%                             |                   |
| 8. Detecting Objects in Images 0%                       |                   |
| 9. Classifying Sequence Data with Recurrent Networks 0% |                   |
| 10. Classifying Categorical Sequences 0%                |                   |
| 11. Generating Sequences of Output 0%                   |                   |

Release: R2018a | Language: English
